

Teacher Contact – Meggin Rosner (rosner@fultonschools.org)

Brief Summary of Internship -

Starting in the middle of May and lasting until the beginning of August, I will be partaking in a summer internship at KSU under my research mentor, Professor Arthur Choi. During this internship, one of our main goals is to produce a “Topic Model Explorer,” intended to be used as both a teaching aid and a research tool by my research mentor. To do this, we will expand upon SPOT (Seeking the Provenance of Topics), a topic explorer model previously built by my research mentor and his student(s). Throughout the summer, I plan on allocating roughly 15 hours per week to this internship.
